

CHEMISTRY

FLIPPED

Topic :Extraction of metals

Flipped Learning Lesson homework in preparation for next lesson:

TOPIC : Extraction of metals

- 1) Write some revision notes on methods of metal extraction.
- 2) Your notes should include a list of metals (and two non-metals, carbon and hydrogen), arranged in order of their chemical reactivity, and explain how their selected metals are extracted. Your explanations should include reference to each metal's position in the reactivity series.
- 3) Videos may be very useful from the Internet or other secondary resources to research their methods of metal extraction.

You must bring it with you to next lesson as you will be using it.
